Time and Place... Twilight, the best thing you can do for him, and yourself right now, is to make sure that you can be a safe place for him, but you can't contribute to his vices. You also can't help him if you're in a spot where you're unsafe or unwell.

weloudfollower asked:
Twilight, shouldn't you all deal with the unicorn killer before you change the past?
I'm worried about The Harvester as much as anypony else is but everything that can be done for the investigation is being done.
That's... Look, the Harvester case is being handled by Warden and myself. We're both better trained to handle a murder investigation than Torchwood is. Leave the Aliens to Torchwood, leave the mundane crimes to the guard.

Anonymous asked:

A few questions for Twilight, if she is still around Have you ever heard of or gone through the "mirror portal" to the Human World? Sunset Shimmer is still over there.. and maybe a past incarnation of The Doctor, or a version that isn't as corrupted as Discord

And before Neo or Jack jumps in and says that going through would kill anypony that tries, the mirror itself acts as a stable gateway between the worlds Their magic potential and the possibility of a Paradox might cause OJR Doctor to be healed or turn into a Causality Loop The risk is great but so is the reward

I have been to the human world on the other side of the mirror yes, I kind of miss it But I wouldn't want to risk sending the Doctor through with Discord's influence hanging onto him, it could put their world in danger too!

Anonymous said
So we need a huge source of energy to help protect against Discord? Why not the elements of harmony? Combine their magic with the TARDIS tech? Maybe consider searching for new bearers?
That's the plan, except we'd be using Torchwood tech rather than TARDIS. So far in the research I've learned the Elements themselves are pieces of a greater whole, something that is outside of our current understanding of the Laws of Conservation of Energy, which all other natural laws coincide with. The Elements are partially sentient and pick users who embody wherever ideals the shards have, in this case the Elements of Friendship.
So they pick ponies at random or is it something more specific?

zegreyus said
Do you have any idea who the new element users of kindness and laughter might be twilight?
Well, I do have a theory for kindness, at the very least. I'm really not sure who could be laughter. I've never met anypony else like Pinkie Pie.

valfiggs5 said
Twilight, it's very possible that Derpy could be the next element of kindness. Her boundless compassion after everything that has happened certainly makes her a very good candidate and I'm sure Angel agrees. Perhaps it's best to try and gather new ponies to bear the elements of harmony in order to defeat discord
That was my thought exactly when I saw how she handled Angel. Angel doesn't just let anypony near him like that, he must have sensed something from her.

The only thing I need to figure out is how to tell for sure who the element bearers are...

I'm going to have NeoSurgeon test me to see if I still host the element of Magic, though I'm not sure if that will work.

I don't know if the elements found new hosts after one element died, if only the ones who died had to find new hosts, or something else. Celestia and Luna used them together, and then Celestia had to use them on her own against Nightmare Moon, and lost them after that until they transferred to us 1,999 years later.

That's a really long time to wait, and I hope that's not the case here. I'm going to assume since the world is in danger that they will find new hosts, but I won't know what to do next until I know if I still have my element.

If I do still have my element, it will be much easier to find the others, because the elements are connected when their hosts form a bond.

Twilight, if the Elements embody friendship, then it should go to ponies who share that bond. And with you being the core of the previous group, then theory states the Elements, if they still accept you as their core, would need to go to ponies who you share a bond with and embody the Elements they represent. Who do you think these could go to?

Besides Derpy being Kindness? Hm, it's really hard for me to say... I guess what might make the most sense is Jack being Honesty or Loyalty? Because he has trouble with both when Discord's curse takes hold.

Jack and Honesty go together like fire and cats, just no. He used to be a conman after all. Though... I can see Loyalty, both due to how he reacts to the curse, and... well let's just say he was very loyal to his adoptive homeworld to the point he made a huge sacrifice in order to rid the planet of some aliens kidnapping children.

Honesty could go to Neo, he's both sentient and sapient, and has demonstrated honesty, even to a brutal level when needed.

I'm not sure, it could work, but I don't know how it could react to a creature that is more machine, A.I. is still a very very very new concept to me, and unheard of over the rest of Equues.

What is that?

So, based on the analysis, is this the same chaos magic discord used on Twilight and her friends or did he have something else planned for the Doctor?
The Doctor's reading has similarities to Applejack's, but his is far far more potent and concentrated. What he did to Twilight's friends was nothing compared to this, there's something else going on for certain. This magic is almost alive...

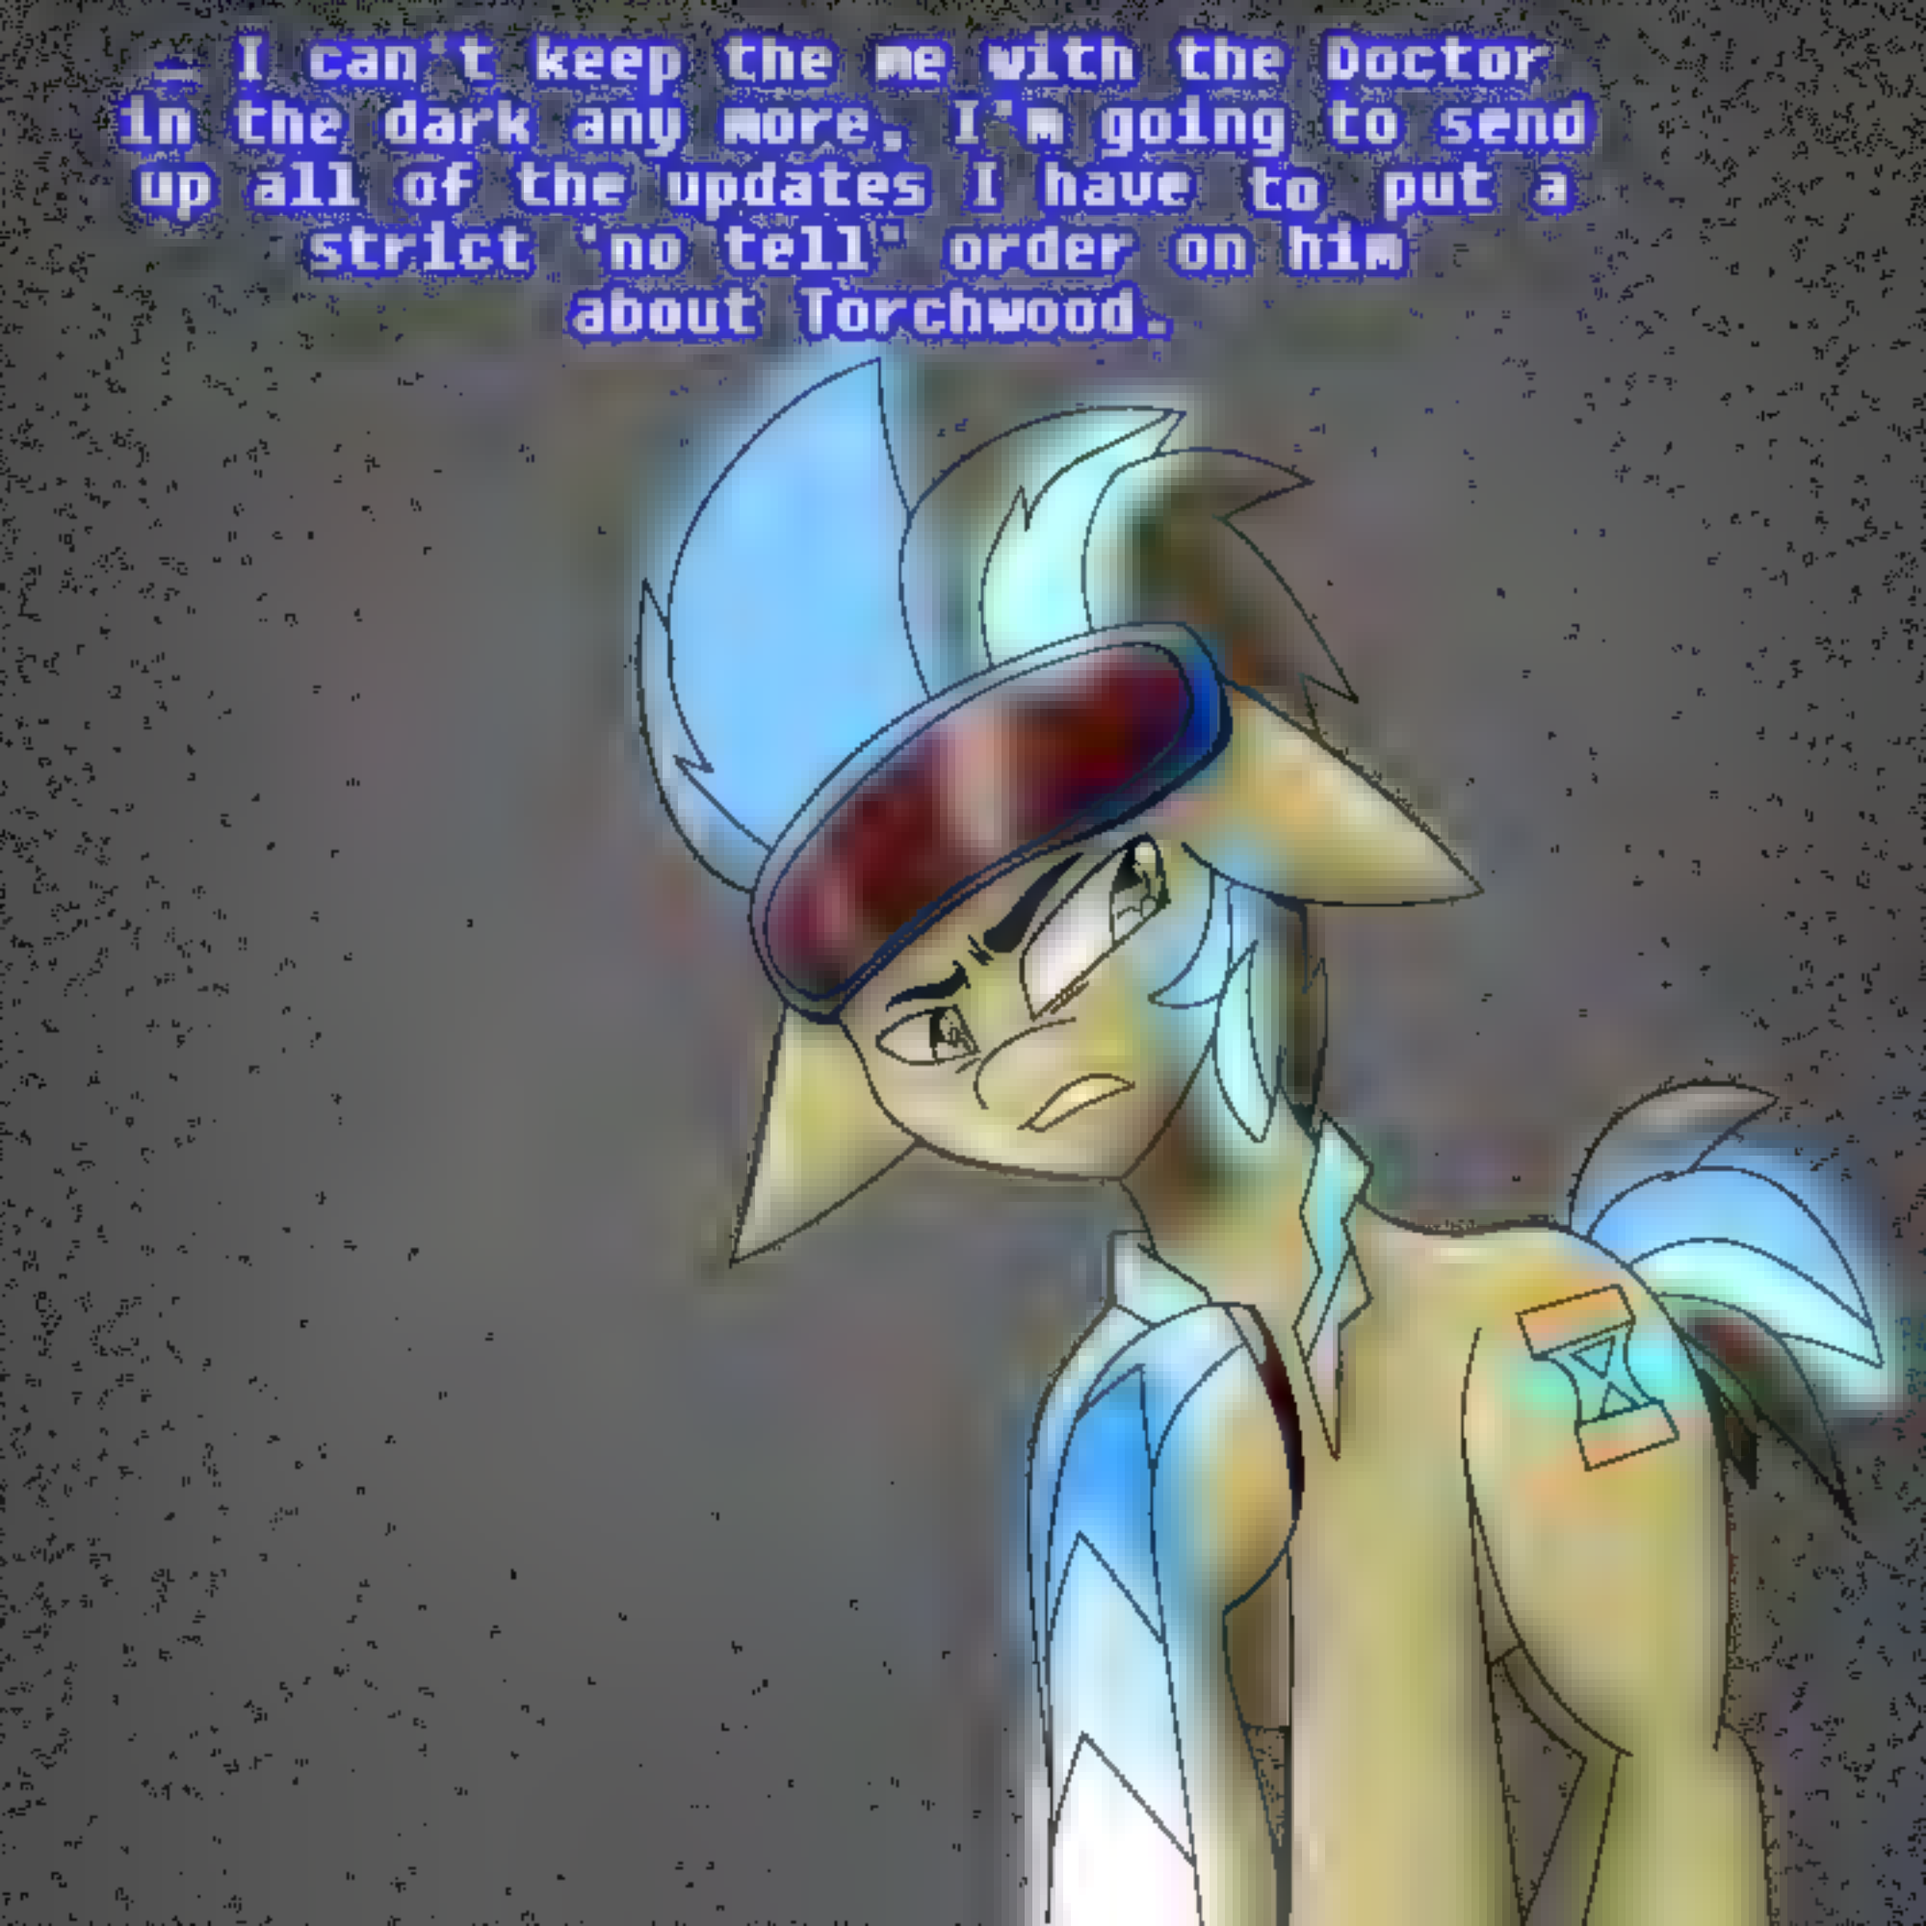
Even if you alter the past Twilight, there's still the problem of the bleeding universes. The only way to stop the bleeding universes is to close the barrier of your universe, though any Time Ponies in that universe will be trapped forever, while some won't be able to enter your universe again

I don't want anyone here to give up on the Doctor, we made progress before, we can make it again. Discord is the one responsible for what happened to Minuette, not him. This... is tragic, tragic news, but it's all the more reason to do whatever we can to fix this. Before anypony else gets hurt.



I can't keep the me with the Doctor in the dark any more. I'm going to send up all of the updates I have to put a strict 'no tell' order on him about Torchwood.

Anonymous asked:
Jack, is Torchwood patching the dimensional holes? If not, any idea who is?
That would be us, yes. We've been using the central planetary rift to close off the walls to other dimensions a little bit at a time.

There's something else that I need to say... Derpy, can we talk alone for a moment?
okay...

Are you doing okay...? I'm pretty shaken up by the news...

.. I know I— I shouldn't but I can't help feeling like what happened to Minuette.. that should have been me..

It could have been you, and thank Celestia it wasn't. We all need you, Derpy.
What do you mean...?

Well... I've been doing a lot of research and theorizing and I'm almost 85% certain that you're a new bearer of the Elements of Harmony.

What?! What are you talking about? Me? I-I'm just a nopony. Why would the Elements choose me?!

You're not just
a nopony, Derpy.
You're just as kind as
Fluttershy was, and that's
why I think you're
Kindness.

But what has kindness gotten me at this point? It wasn't enough to help the Doctor—

But it will be. Please. Believe in yourself a little more.

I think we should have NeoSurgeon give you a reading, and compare it to me to see if we can tell if you really do have the Element of Kindness.
O-okay...

ellie-the-awesome-f1 asked:
Derpy, it may be scary, but no one's more deserving of kindness than you It's something you have to wake up and choose again and again no matter how much it hurts, and you've done that for years with such grace anyone would strive to emulate.

S-so what are the results?

You and Twilight both share a unique signature not found in other ponies, and there were trace amounts of it in Applejack as well though it was more like leftover crumbs. I think we can safely say you are an Element Bearer, Derpy.

But your signature is weaker, currently in a dormant state.

Oohh that's so much responsibility! I don't know if I can! How do I activate it? What if I mess up?!

I'm sure you'll do just fine,
Derpy, you have a strong heart.

I think this means we need to look at your closest bonds to figure out who the other elements are. A bond shared by everypony.

Actually... I have this gut feeling that it would make more sense to look at The Doctor's closest bonds. He's at the center of this, after all.

That makes sense, actually...!
So you and I have a close connection to him, and you know who else does?

o o o What?

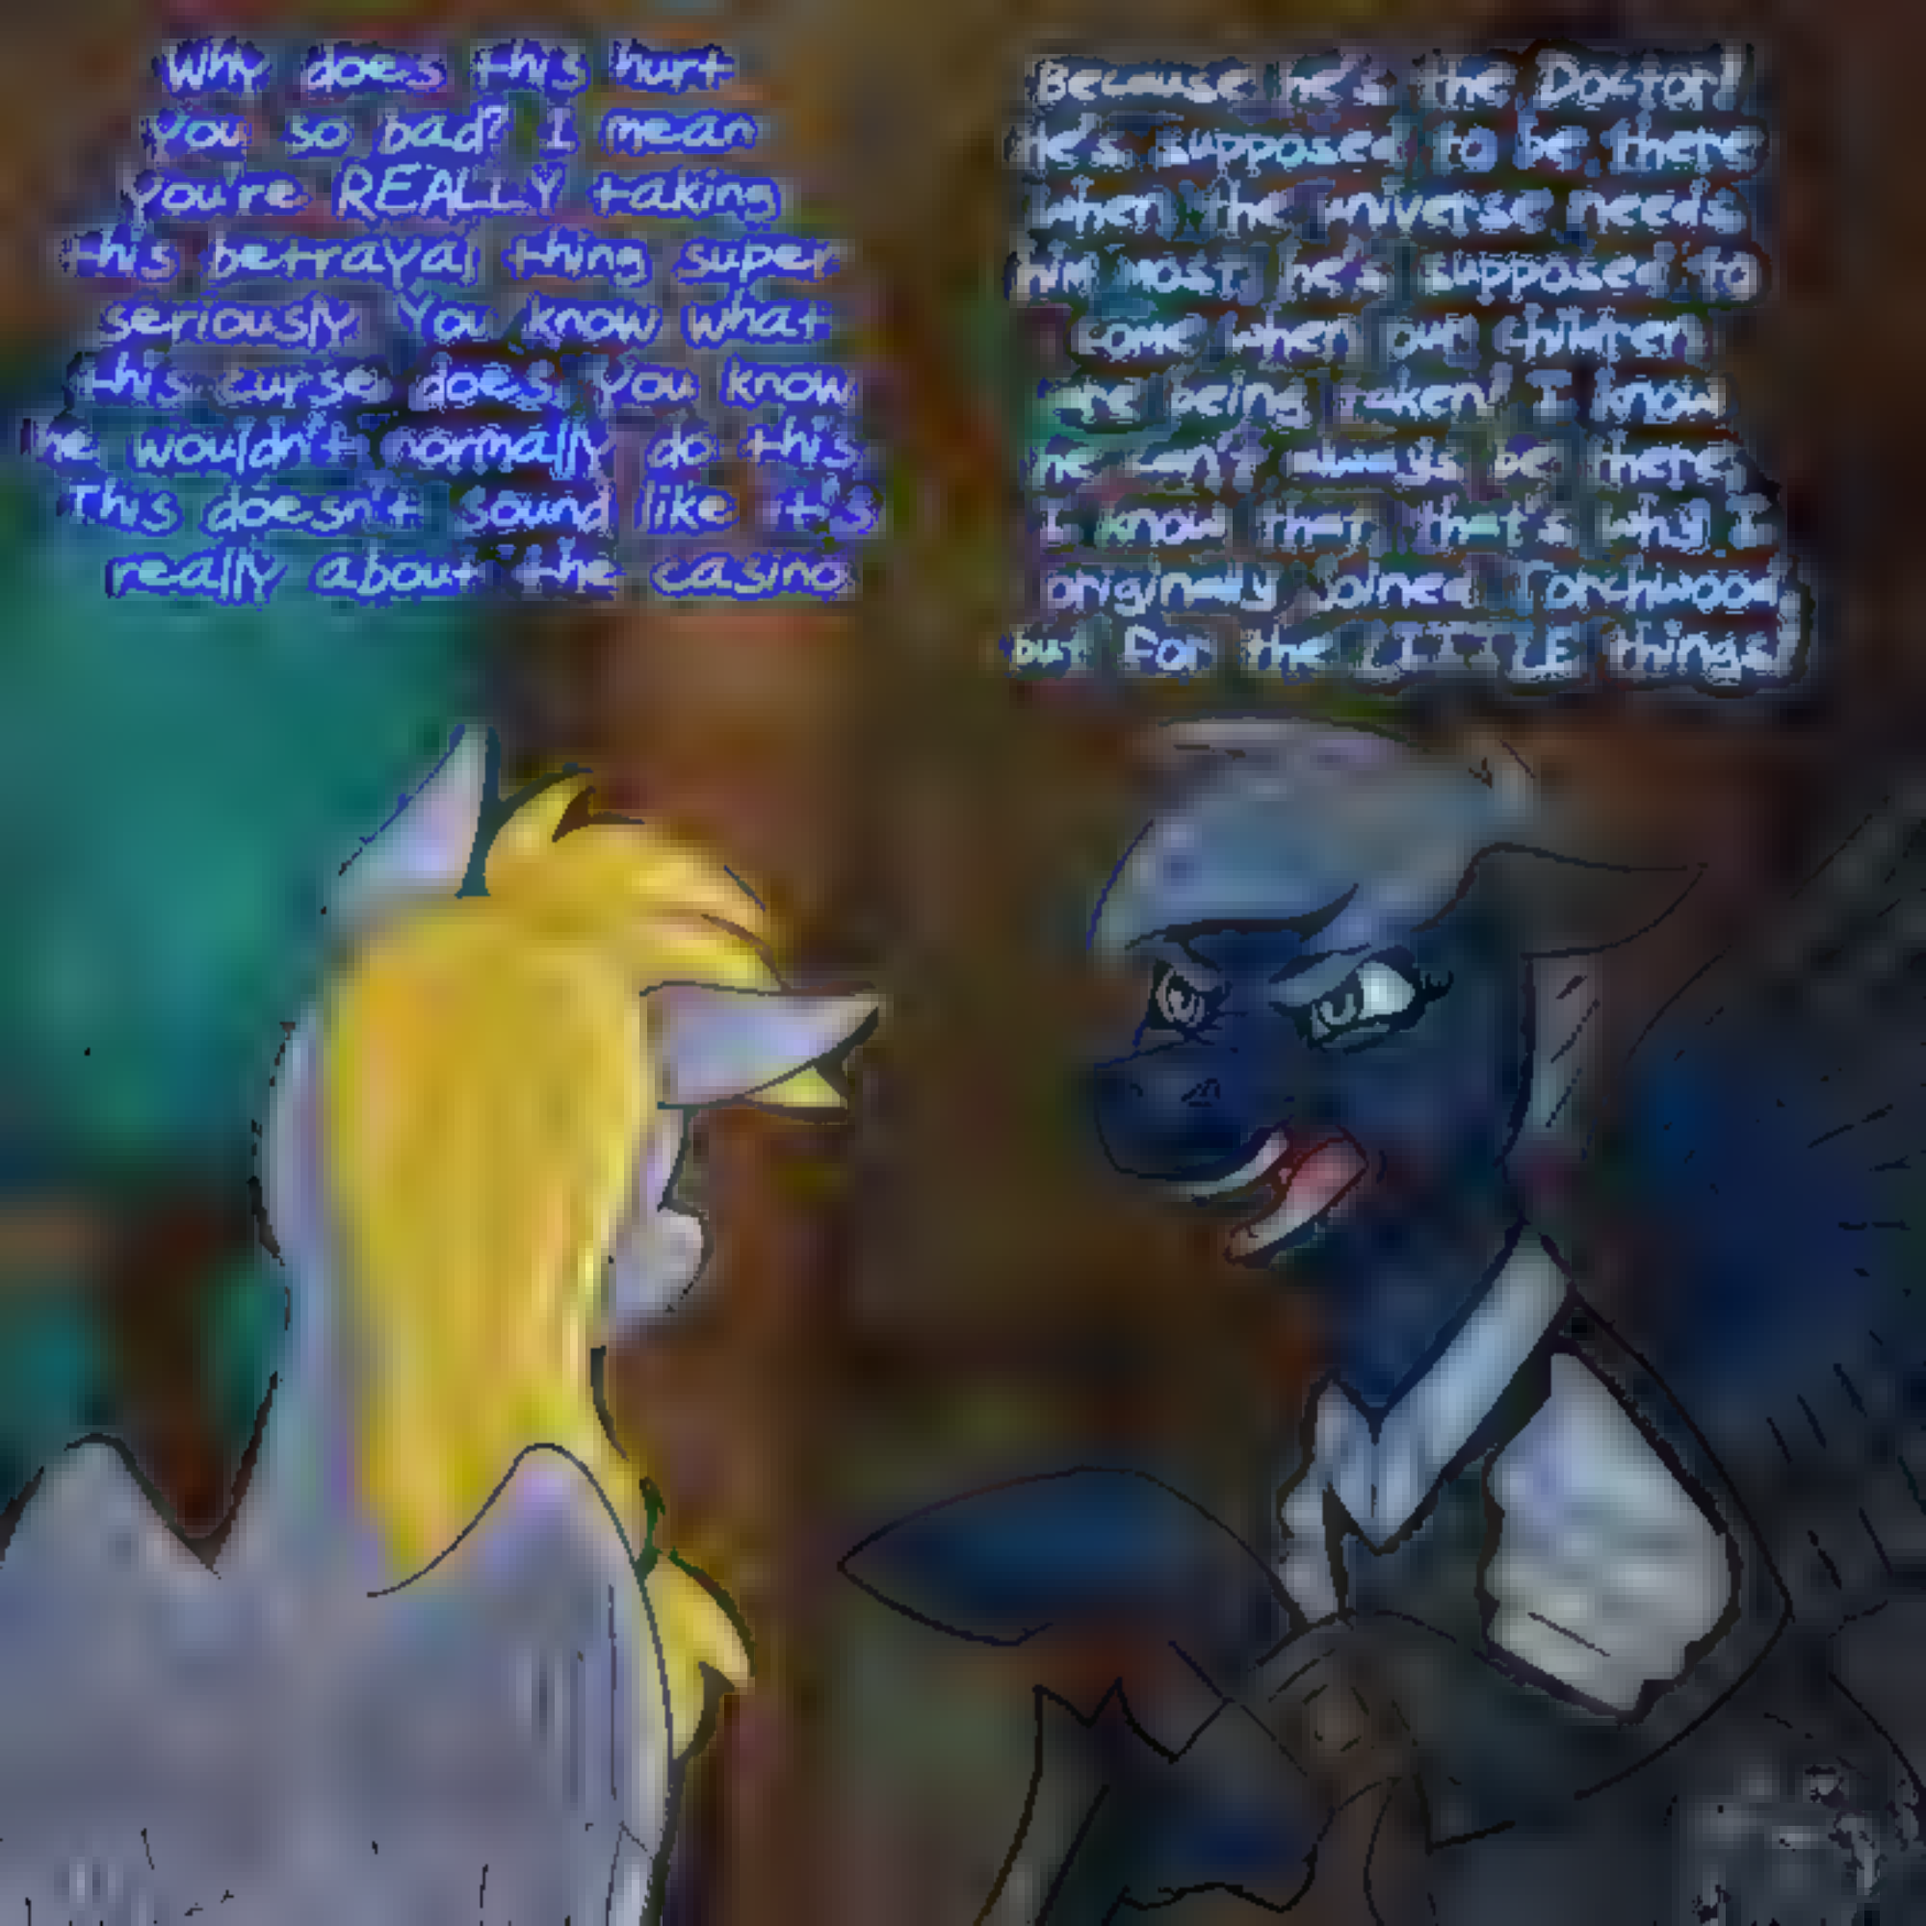
meowiemari asked:
Are you kidding us Jack?
You do have a special sort of bond with the Doctor, Jack.

We HAD one, I'm pretty
sure that bond is broken now.

Almost all I can ever think
about is revenge for when he betrayed
me, betrayed everyone at that casino...
I want to see him suffer, I want—

Dammit, it's happening again, it's getting worse...

Wait. I think
You need to stop
taking the easy way
out and really face
these emotions.



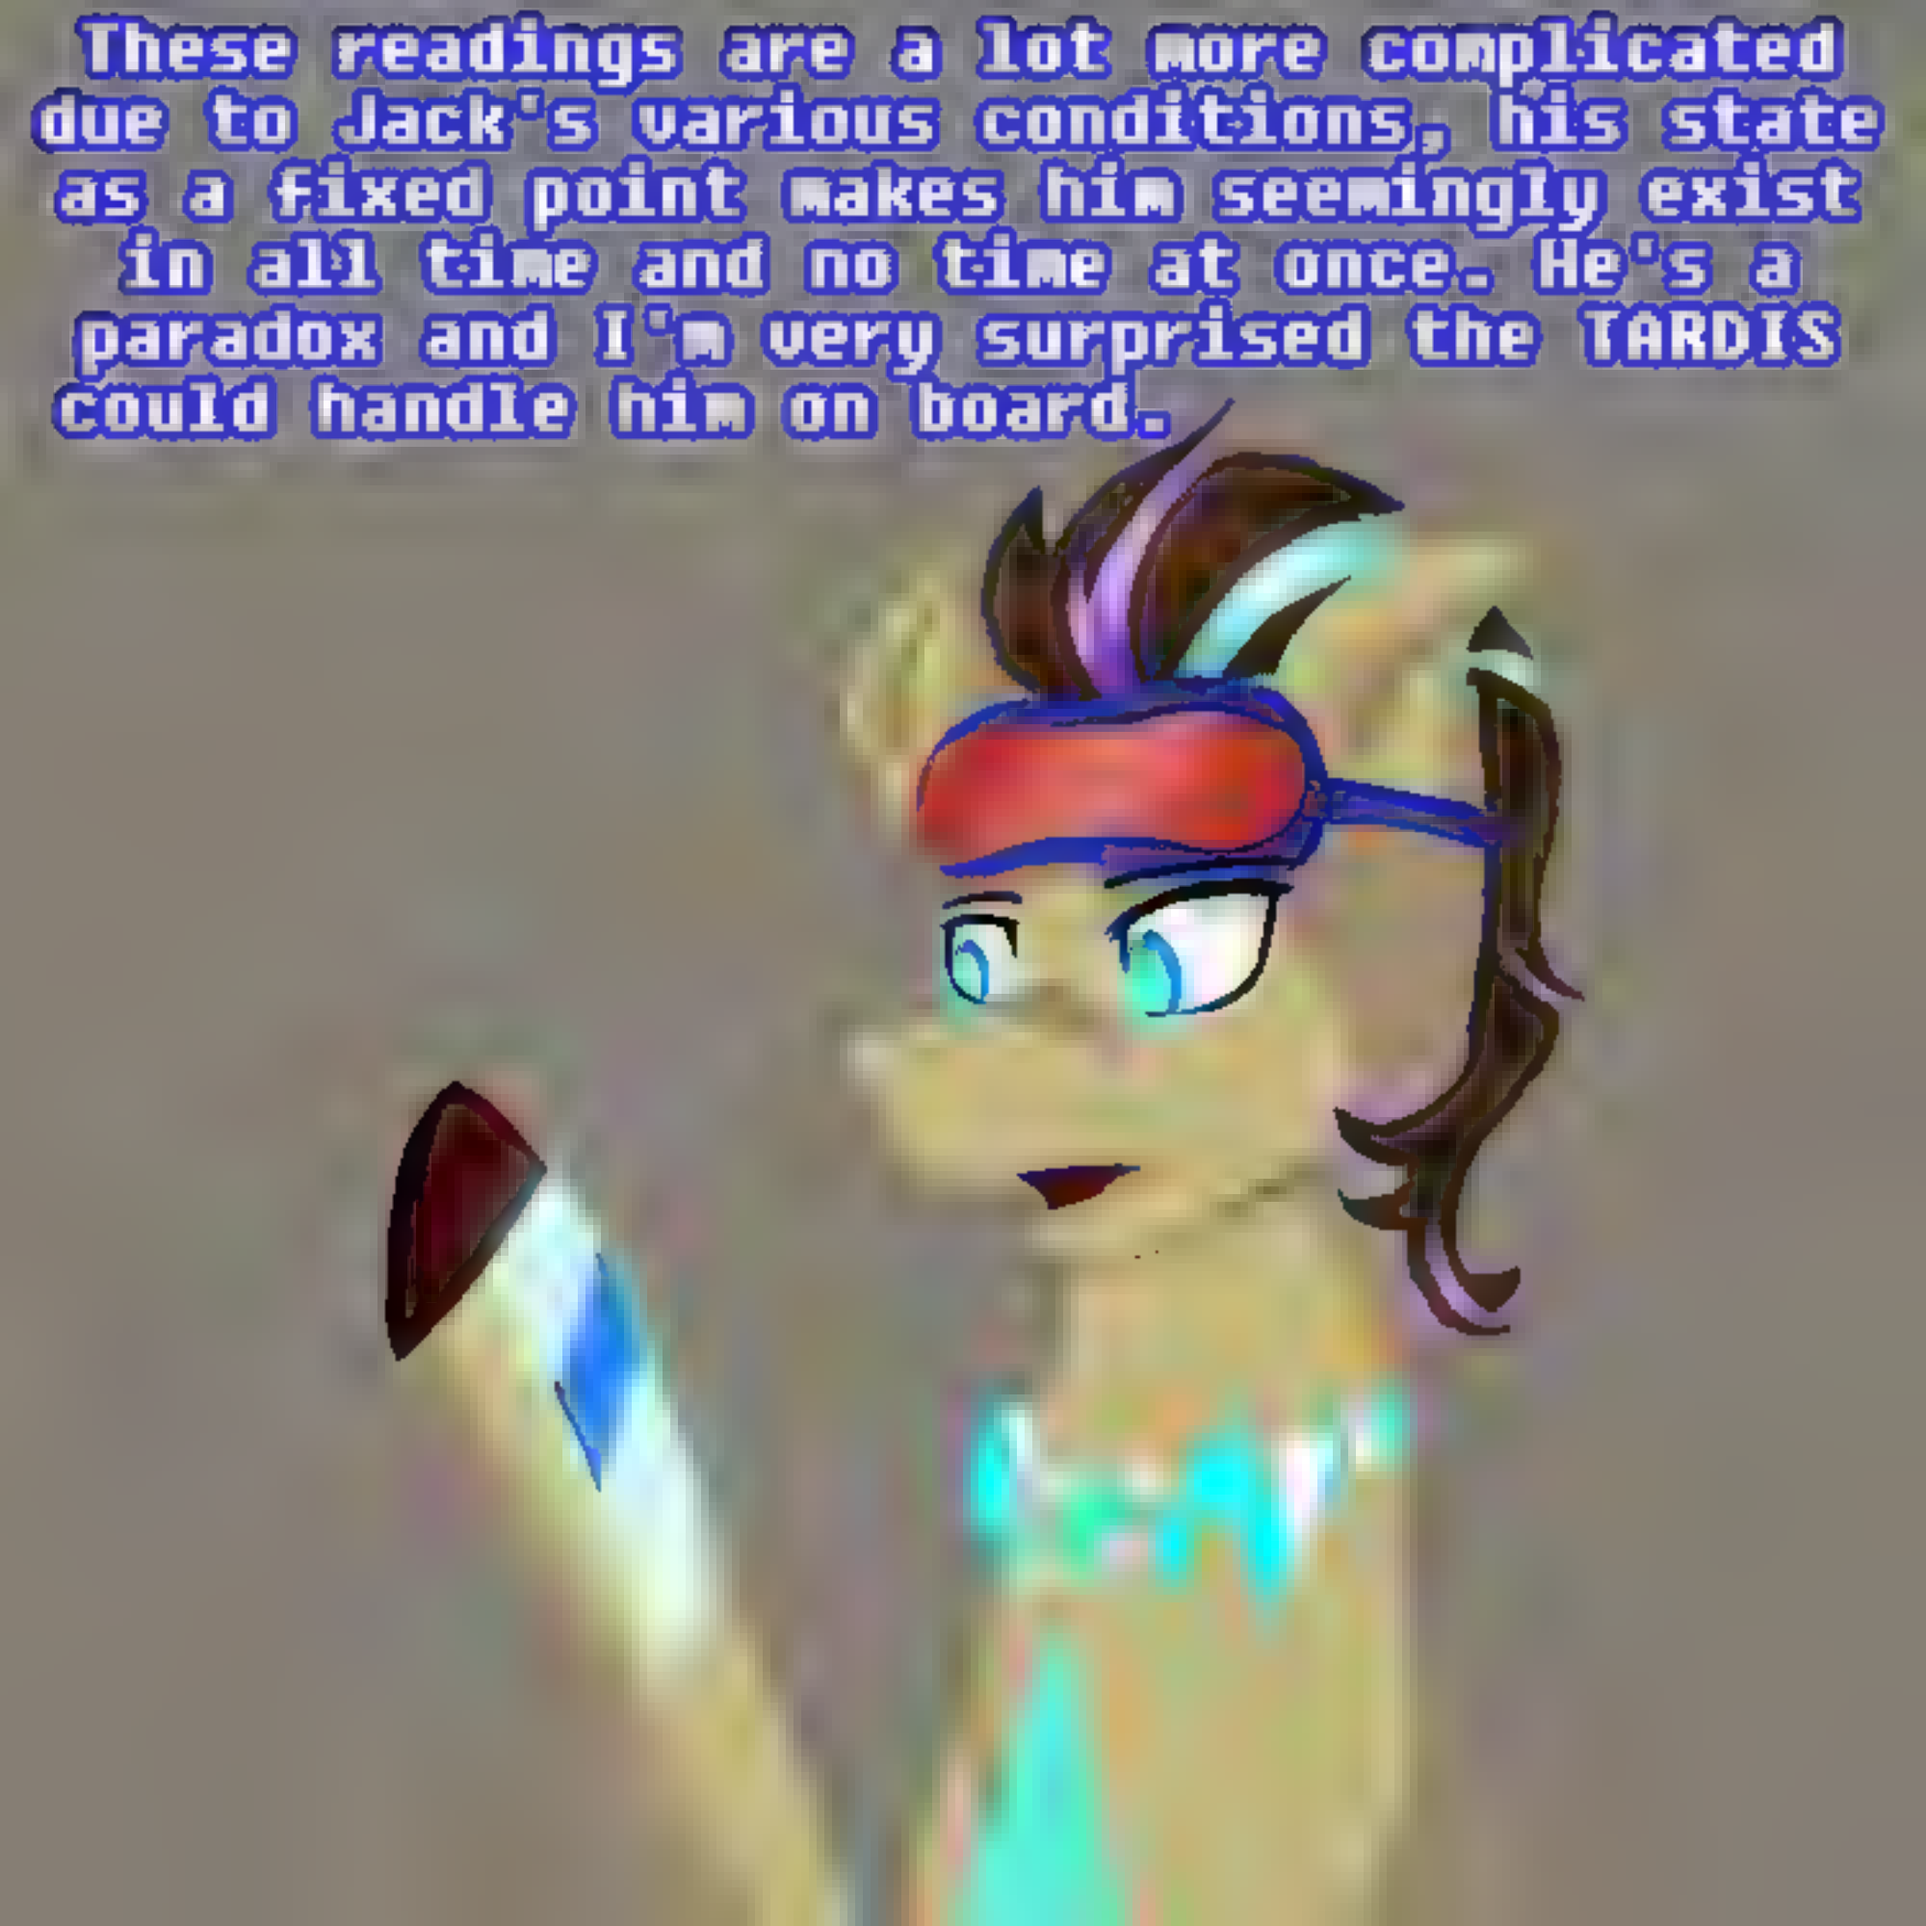
Why does this hurt you so bad? I mean You're REALLY taking this betrayal thing super seriously. You know what this curse does. You know he wouldn't normally do this. This doesn't sound like it's really about the casino.
Because he's the Doctor! He's supposed to be there when the universe needs him most. He's supposed to come when our children are being taken! I know he can't always be there, I know that. That's why I originally joined Torchwood, but for the LITTLE things!

I thought, you know, maybe he was held up and he just really couldn't get there on time, and I had to do the unthinkable in his place when he would have been able to come up with something brilliant. But then seeing him choosing to run at the casino, I couldn't accept that!!!

vexhoor asked:
Jack could possibly be Loyalty, if he is a bearer
It sounds to me like... You REALLY value loyalty. Especially because this curse makes you anything but loyal.
Sometimes... I really question where my loyalty lies... It's obviously not to family, I mean what's family when you're an immortal and they aren't? But The Doctor, he can always be around somehow. He made me a better person.

You love him, too.
I guess that's why it hurts so much.
The three of us have that in common.

I think Jack is a good candidate for loyalty, but perhaps his curse was making it hard to detect in readings. Let's have NeoSurgeon try another scan, now that he knows what he's looking for!



These readings are a lot more complicated due to Jack's various conditions, his state as a fixed point makes him seemingly exist in all time and no time at once. He's a paradox and I'm very surprised the TARDIS could handle him on board.

You know, you make a good point. The TARDIS couldn't stand me after I died. I wonder what made it different this time? We should look into that if we can.

Yes, well, because you're so complex it is going to take a while to root out everything and locate the Elemental energy.
Well, in the meantime I guess there's a discussion that needs to happen.

So with all these little revelations, have we gotten any more ideas about the Elements? There are six total, right?
Correct. Honesty, Laughter, Loyalty, Kindness, Generosity, and Magic.

I was thinking... If the elements really are all connected to Twilight and The Doctor, it would make sense that The Doctor is an element bearer too, right?

That does make sense. It could explain part of why Discord was able to corrupt him as badly as he did.
But what element would The Doctor be...? Definitely not Honesty.
No way. Even I know that.

I'm not sure laughter works either, though I didn't really know him before he was corrupted.
He does use laughter a lot but I don't feel it's genuine a lot of the time.
You have a point there.

Anonymousasked:

Do you think the doctor in his normal non cursed state could be generosity?? he was incredibly selfless and giving when adventuring with derpy

I think it makes sense, doesn't it? How he is constantly sacrificing himself, sharing the universe with others, he's always seeming to be giving something when he can..

Anonymousasked:
Twilight/Derpy, do you think that the non-cursed version of doc could be the element of generosity?? He was always sacrificing for others
And compare to how selfish he is now...
You have a point there.

It really does make a lot of sense.
Then we need to ask Neo about his readings of the Doctor too, see if he can find the Element in him also.
This is the progress we need.

thedumbowl asked:
Have you tried out any magical method to search for the elements? Maybe you'll have an advantage, being one yourself
There's actually a spell in Star Swirl's notes that has to do with locating the Elements in an emergency, but I'm still translating it right now. Once I learn this spell, we can finally be certain who they are.

Anonymousasked:
Twilight, are you prepared to defend yourself against the doctor if it really came down to it? the closer he gets to recovery the more aggressive the curse becomes. you should limit your interaction with the doctor or put some security measures in check. even though ditzy is capable of self defense, she always freezes with him. don't mistake your abilities for safety
When it comes down to it, I'm a lot stronger than the Doctor, magically speaking. I can hold my own but... for now, I'm staying in Torchwood until it's safe. I left a note at the library letting the Doctor know I'm in a safe place for now.

Anonymousasked:
Well, why not Amethyst Sparkler for Laughter?
You really think Sparkler could be an Element? It's already such a big responsibility for me. I'd hate for that to be put on her..
It's worth looking into... And with the climate of Equestria getting more volatile, maybe it's best you bring the girls here.

Anonymousasked:
Hey, maybe Torin could be the new Laughter!

Anonymousasked:
Just a theory.. Torin, could you represent the element of laughter? You may not be a jokester, but you certainly have a way of putting smiles on people's faces even in the roughest of moments.

Well... We shouldn't rule out the possibility... I think it's possible.
I'm ready to join the Skittles brigade.

I wouldn't do that, she's... it's nasty what happened.

Blunt force trauma is the cause of death. They smashed her skull in and made sure the squints identify her with dental records or visual examination.

Her horn was sawn off while she was still alive, and after she was killed, her cutie mark was shredded to ribbons, this time, it was personal.

If it wasn't for her coat and mane, plus the rise in unrest in the diamond dogs, we'd have no idea who she is.
Trixie Luamoon. The Canis Regina herself.

I haven't had one of these since I got away from the Diamond Dogs last time. Once again, it's a unicorn, with talents in entertainment.

There more murders there are, the better they're getting at covering their tracks. But there is a smell here, and it's... unsettling.

What do you mean?
I smell... sex, between two ponies, mare and stallion. I think our unicorn murderers are two ponies, and this time, it was personal and sexual.
CRIME

We have two killers, and one or both is using it for sexual stimulation. They're taking trophies, the horns from unicorns with talents in the entertainment field. At least one of them knew her on some personal level.
The other smell, the masculine one, smells... familiar, but I can't put my hoof on it. It's been a very long time since I've smelled it.

What if this is the moment Discord infected the pool? What if, at the very beginning, it was the Doctor all along?
Anonymous asked
Doc, what if, theoretically, Discord only showed up because something attracted his attention to the mirror pool back when it was a normal pond? Say, two Time Lords?
Anonymous asked:
Doctor, what if the reason the pool was corrupted was because of your visit it right now?
- That's exactly what happened, I'm sure of it. Dammit, I should have known better...!

Anonymous asked
Well don't keep us in suspense good Doctor! Go on! Twilight's been overdue for her beating. Give her a smack. Kick her, trample her, snap her horn, shoot her! just do her in like everyone else you've ever loved in this universe!!!
I-I thought about it, I actually thought about it. Everything is so much worse now.

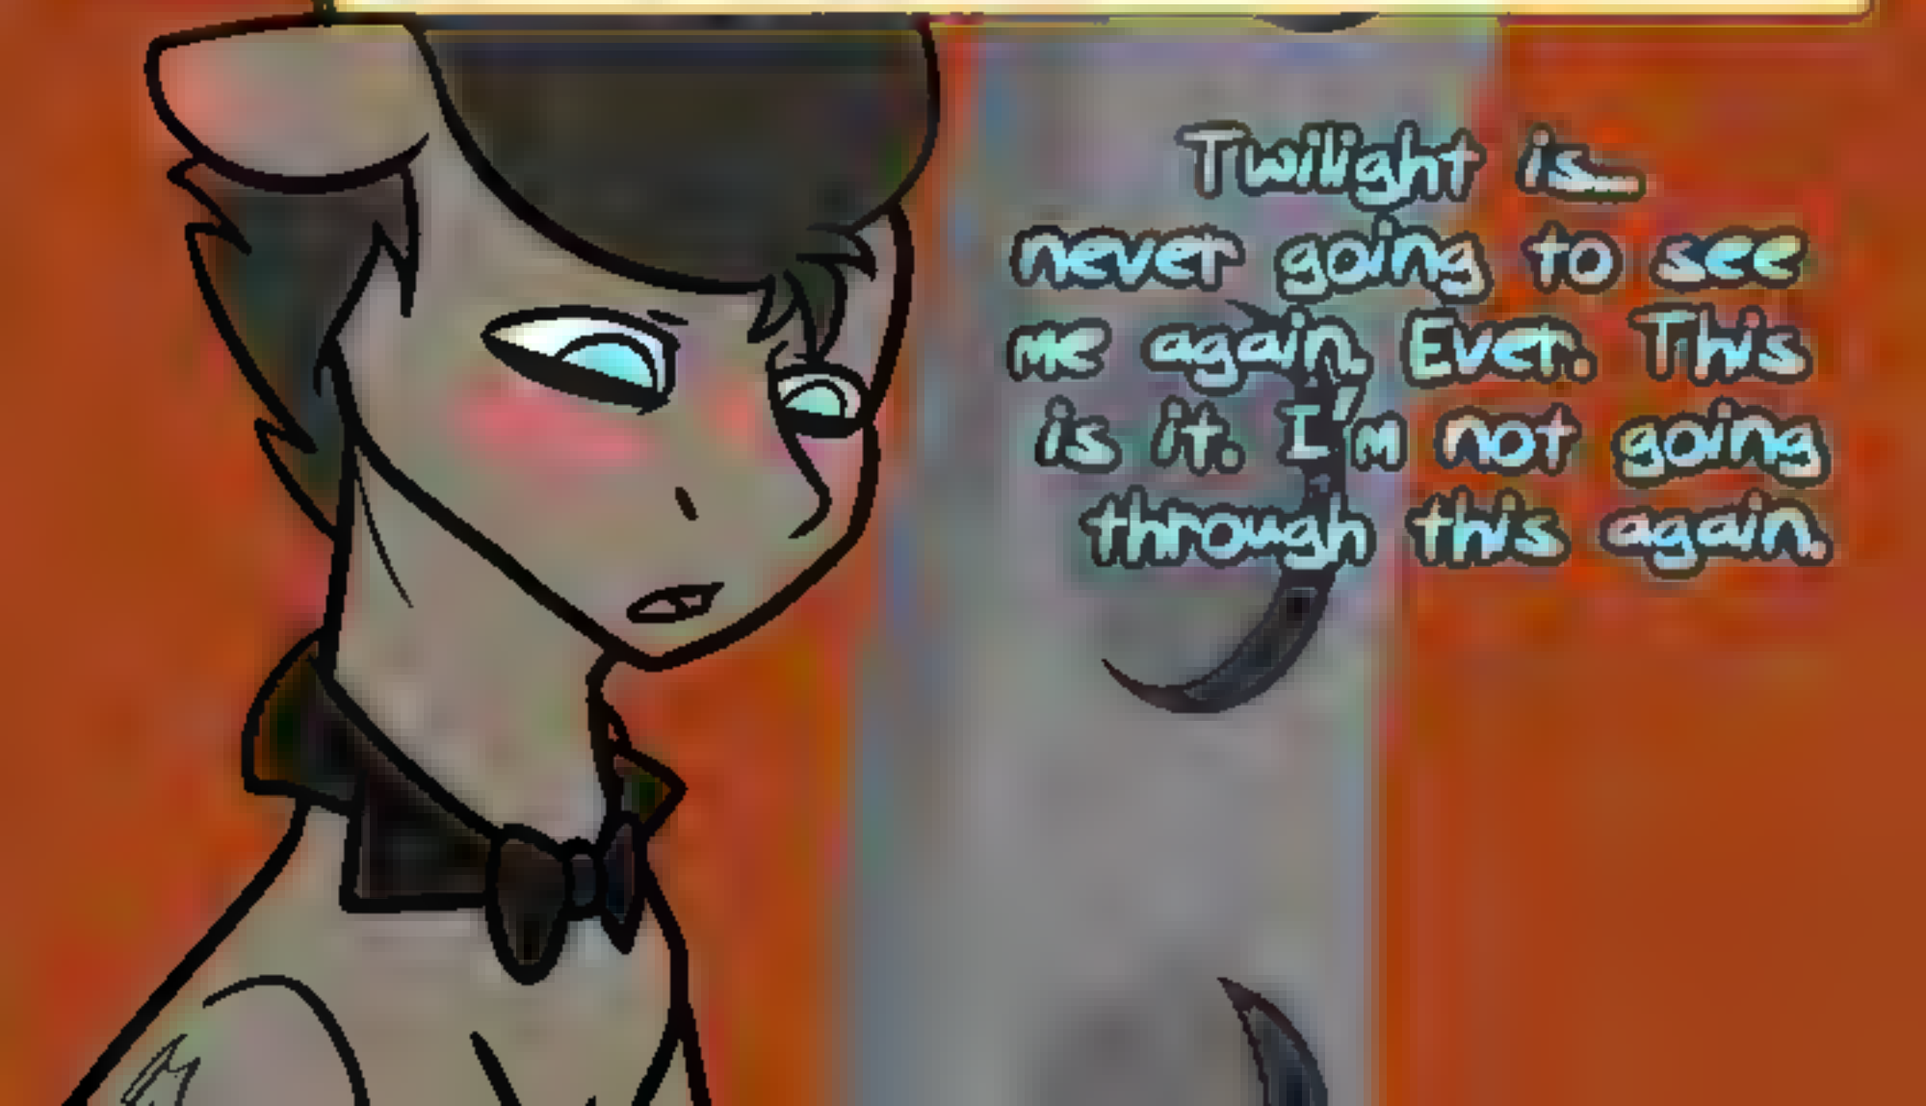
93chowo asked:
Are you proud of yourse f? Hurting one of the, if not the last person/pony who is willing to help you? Acting like a child who doesn t like it that someone else is spending time with your friend. And even after that I be leve she is willing to forg ve you.
I didn't... want to I... just saw red and I couldn't stop it from happening. like a prisoner in my own body...!

Anonymousasked:
You witnessed first hand how Twilight reacted to finding out one of her friends murdered another one of her friends.. And well, now that that also applies to you..

Anonymousasked:
Bet Twilight wouldn't have let you off the hook so easily had she known what you actually did to Patience, ya friggin' murderer.

Anonymousasked:
After Twilight finds out what you did to patience, She'll hate you Doctor

Anonymous asked:
What's Twilight going to think when she finds out you murdered Minuette? Twilight was involved with the Master once before and that is what you murdered Minuette for



Anonymous asked:

Oh, you straight up murdered Patience, I didn't think you would sink that far What exactly makes you different from the Master now? I guess Discord wins after all, shame

The Master has committed atrocities over multiple lives with no regrets, even if he were to regret them now I doubt he fully grasps goodness as a concept.

But maybe we're not so different now, he was driven by the madness of the drums and now I know they're with me.

ask-summer-epos asked:
minuette!? why would you violently abuse her, your worse then the master, there is no anointment for killing an innocent, your black and white thinking have tainted you..
People like you are so bloody unreasonable, killing one person is not worse than mundicide, planetary wide slavery, and whatever the hell you want to call taking the last of humanity at the end of time and turning them into killing machines against the humans of the past.
"Oh boo hoo you killed an innocent that is SOOOO much worse than the guy who did it to millions for fun!"
Piss off.

Anonymous asked
Wow Doc. First Derpy, then Jack, now Patience. Is it any wonder theres no saving you? I'm sure Twilight's next. You've almost hurt her before. You push everypony away that has tried to help you. You see everypony as a traitor. Have you ever considered maybe you're the real traitor in all of this? Maybe you should learn that everypony has skeletons in their closet, just like you
Maybe I should stop it for good.

Anonymous asked:

Derpy left because you were a danger to her well being. That isn't something she needs to apolog se for and it in no way excuses how you abused her. You continually prioritise your own wellbeing above all else by refusing to even see her OR the children you refuse to take responsibility for. So why is it okay for you to practice self-care but when she did it, it was a 'betrayal'?

xxxrandomman64xxx asked:
Oh Doctor, Doctor, Doctor . Surely as someone interested in stories, you should recall that in the first telling of Jekyll's story, Hyde was manufactured? Just something the "good doctor" made up to avoid recompense for indulging his terrible habits.. Well *Doctor*, I think it's time to drop the charade To stop lying to yourself. It's time to stop hiding . from *Hyde*.

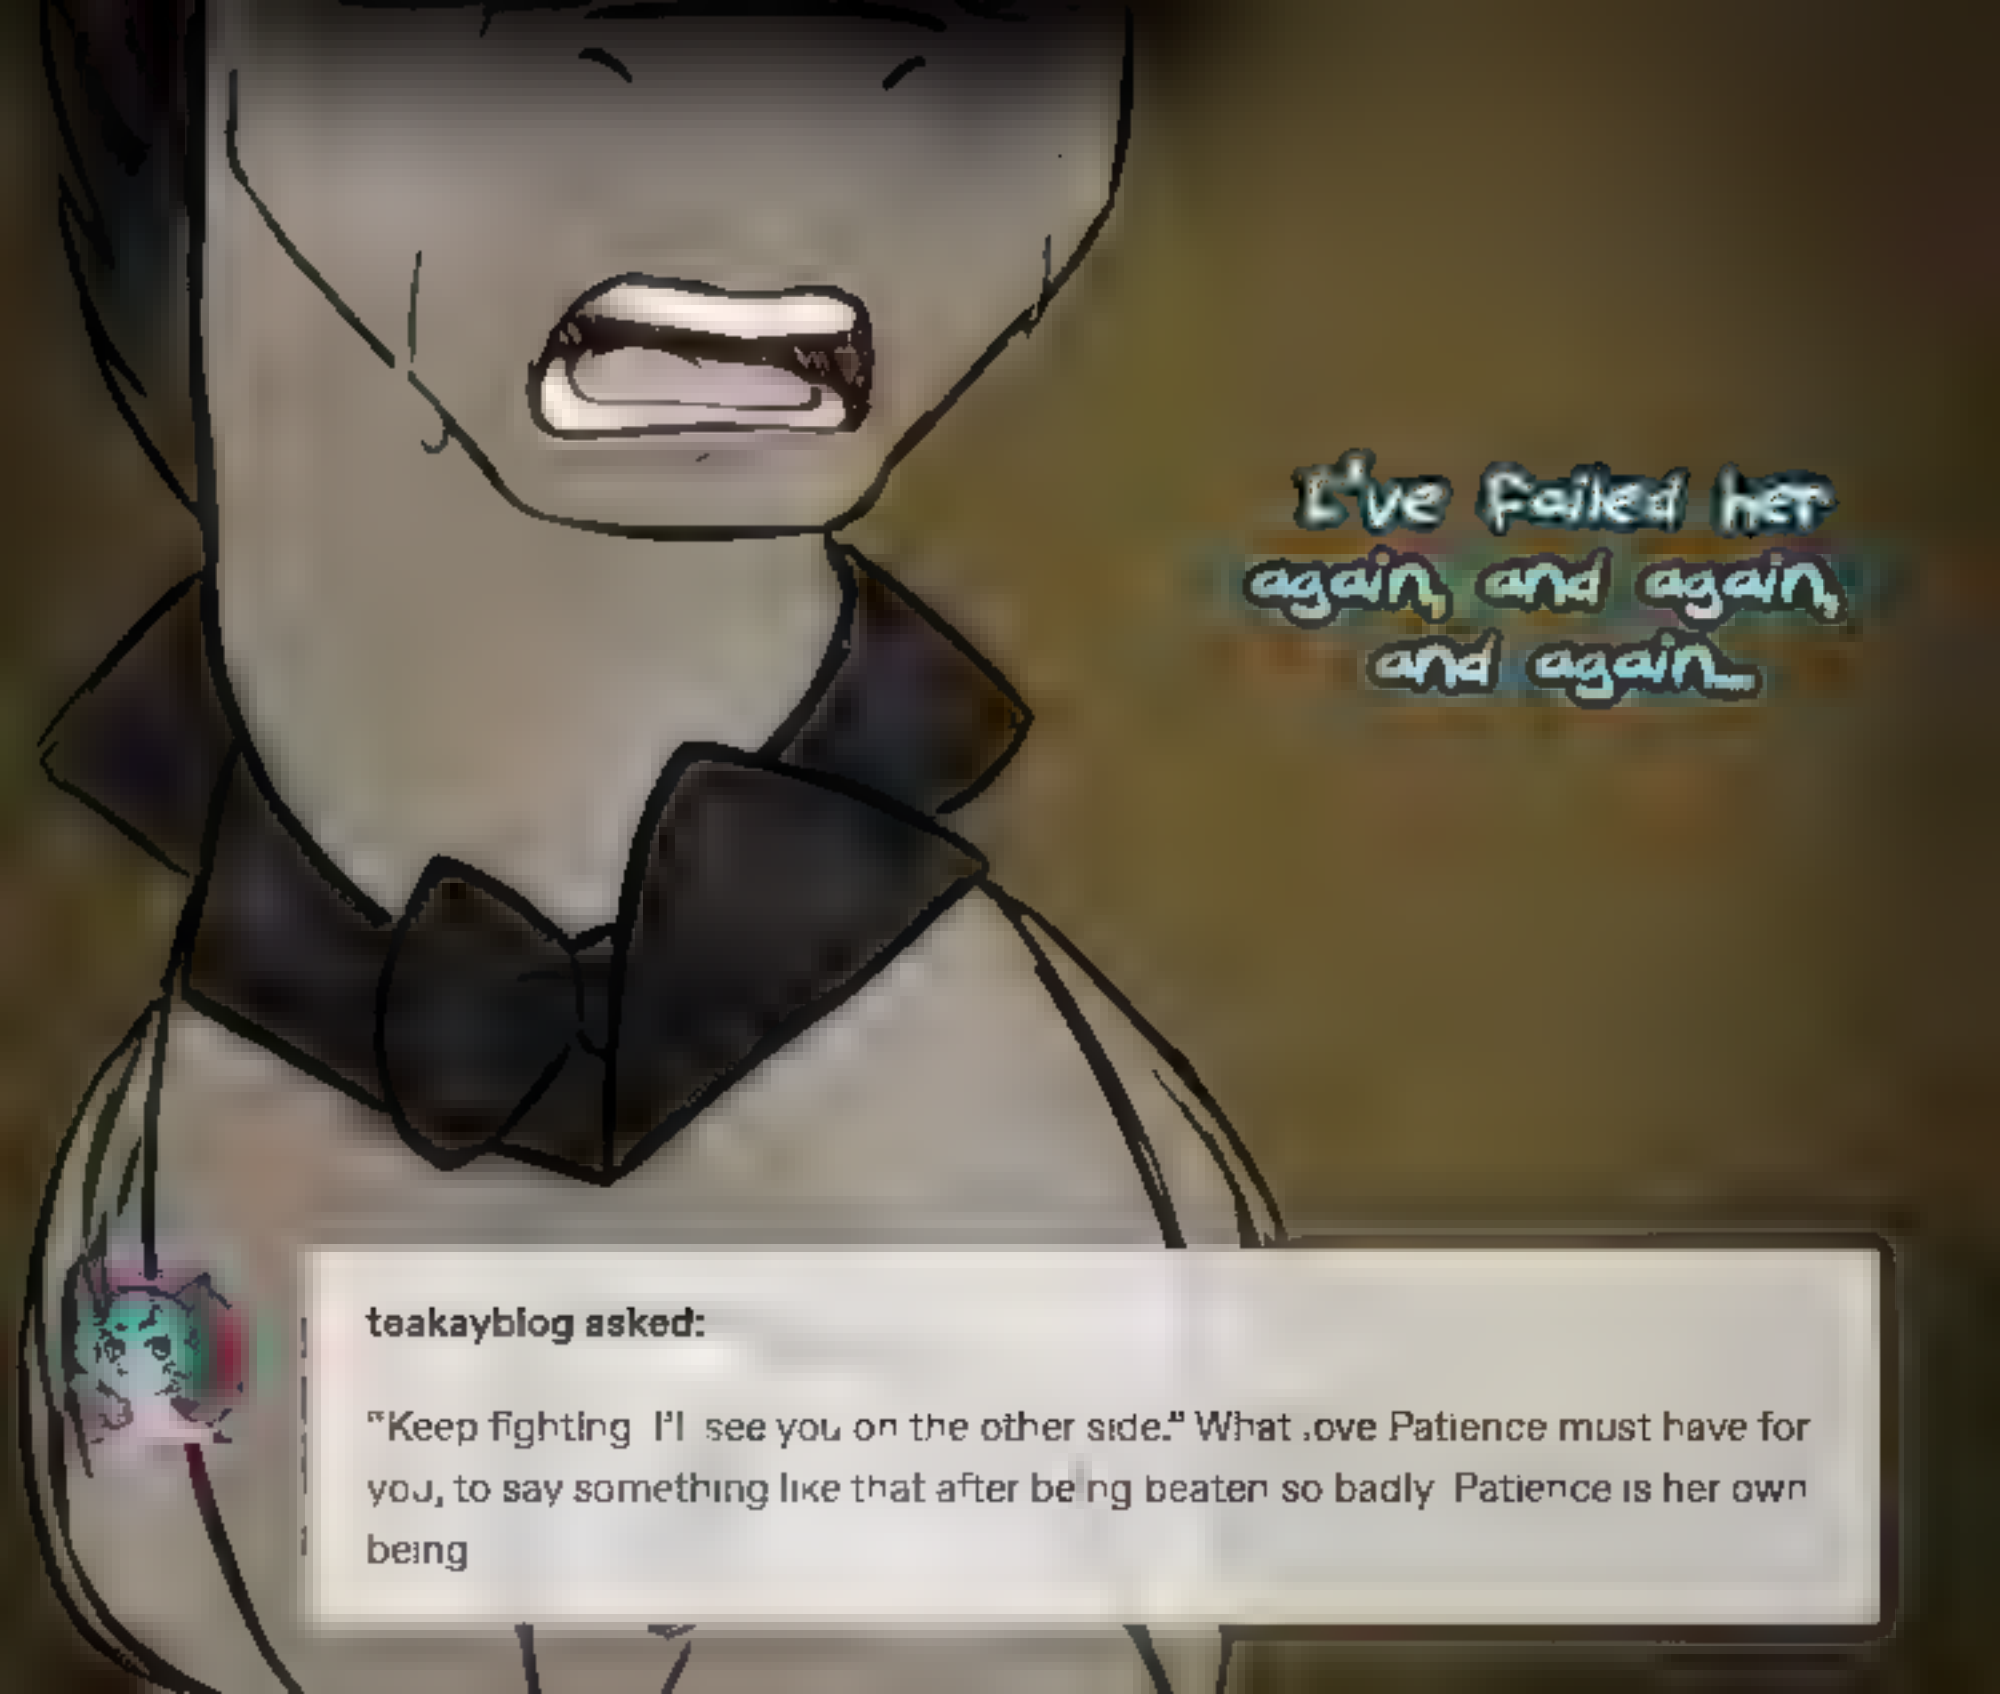
TH-TH-TH-THUMP

No I can't let this keep happening. I can't let it infect everything around me!!

crooked-djinn asked:
is it be mere coincidence you broke off her horn? Or is this the start of something?
Anonymous asked:
Well.. ..... You have a disembodied horn now. Perhaps you were the unicorn killer all along?

ss117 asked

So, Doctor, or should I say Hyde, are you going to keep her horn? Make it a souvenir?



teakayblog asked:

"Keep fighting I'l see you on the other side." What .ove Patience must have for you, to say something like that after be ng beaten so badly Patience is her own being

It's sad to see you this way Doc, just a sad pathetic puppet. Not even capable of your own actions anymore

Coward worthless Coward Do you even care about Twilight or Ditzy? There s no Doctor left, you are nothing The universe would be better with you gone Leave it to the real heros you worthless coward
I am far, far worse than nothing... I'm just a parody.

reggiebunny asked:
Wow you're pathetic. A few little lies and you snap like a twig Maybe you deserve to be miserable Maybe you are exactly where you should be. No one should bother saving you Why should they?
I... am going to save myself... I am going to save everyone...

Anonymous asked
"Never cruel nor cowardly." I'd say that's both tenants broken now. You're no Doctor, you're wholly undeserving of the name. You're the Valeyard through and through. Irredeemable. So congratulations, you've actually made me start rooting for The Master to finally end your miserable little life. And I hope it's in the worst, most excruciating way possible.
I won't let the Valeyard infest this universe, I won't cause any more problems.

I wonder what the master will do once he learns about happen to patience.

reversal-mushroom asked:

What's the Master going to think when he finds out you killed his girlfriend?

hqluvvr asked:

Hyde, I don't think you want to piss off the Master. You know he's a monster when he gets angry

DOONGI

CLATTA

SLAM

You couldn't just leave her out of this.

You just had to have your way in the end.

GRAH!!

CRACK

The Oncoming Storm threw a fit like a petulant foal and killed the only one that wanted to truly help you.

You killed my Patience, and now my patience has run out.

So now, I'm done playing, I'm done trying to protect the world from you and letting you have your freedom.

So here I am Doctor, I'm now your Jailor, your Warden, and your Judge.

scorpio-gustavo asked:

I love your wings! I hope you keep them this time <3

You took her from me. You tortured her, and broke her horn off.

SO I'm taking your wings.

RRRrIIPP

AAAAUUUUGHH!!!

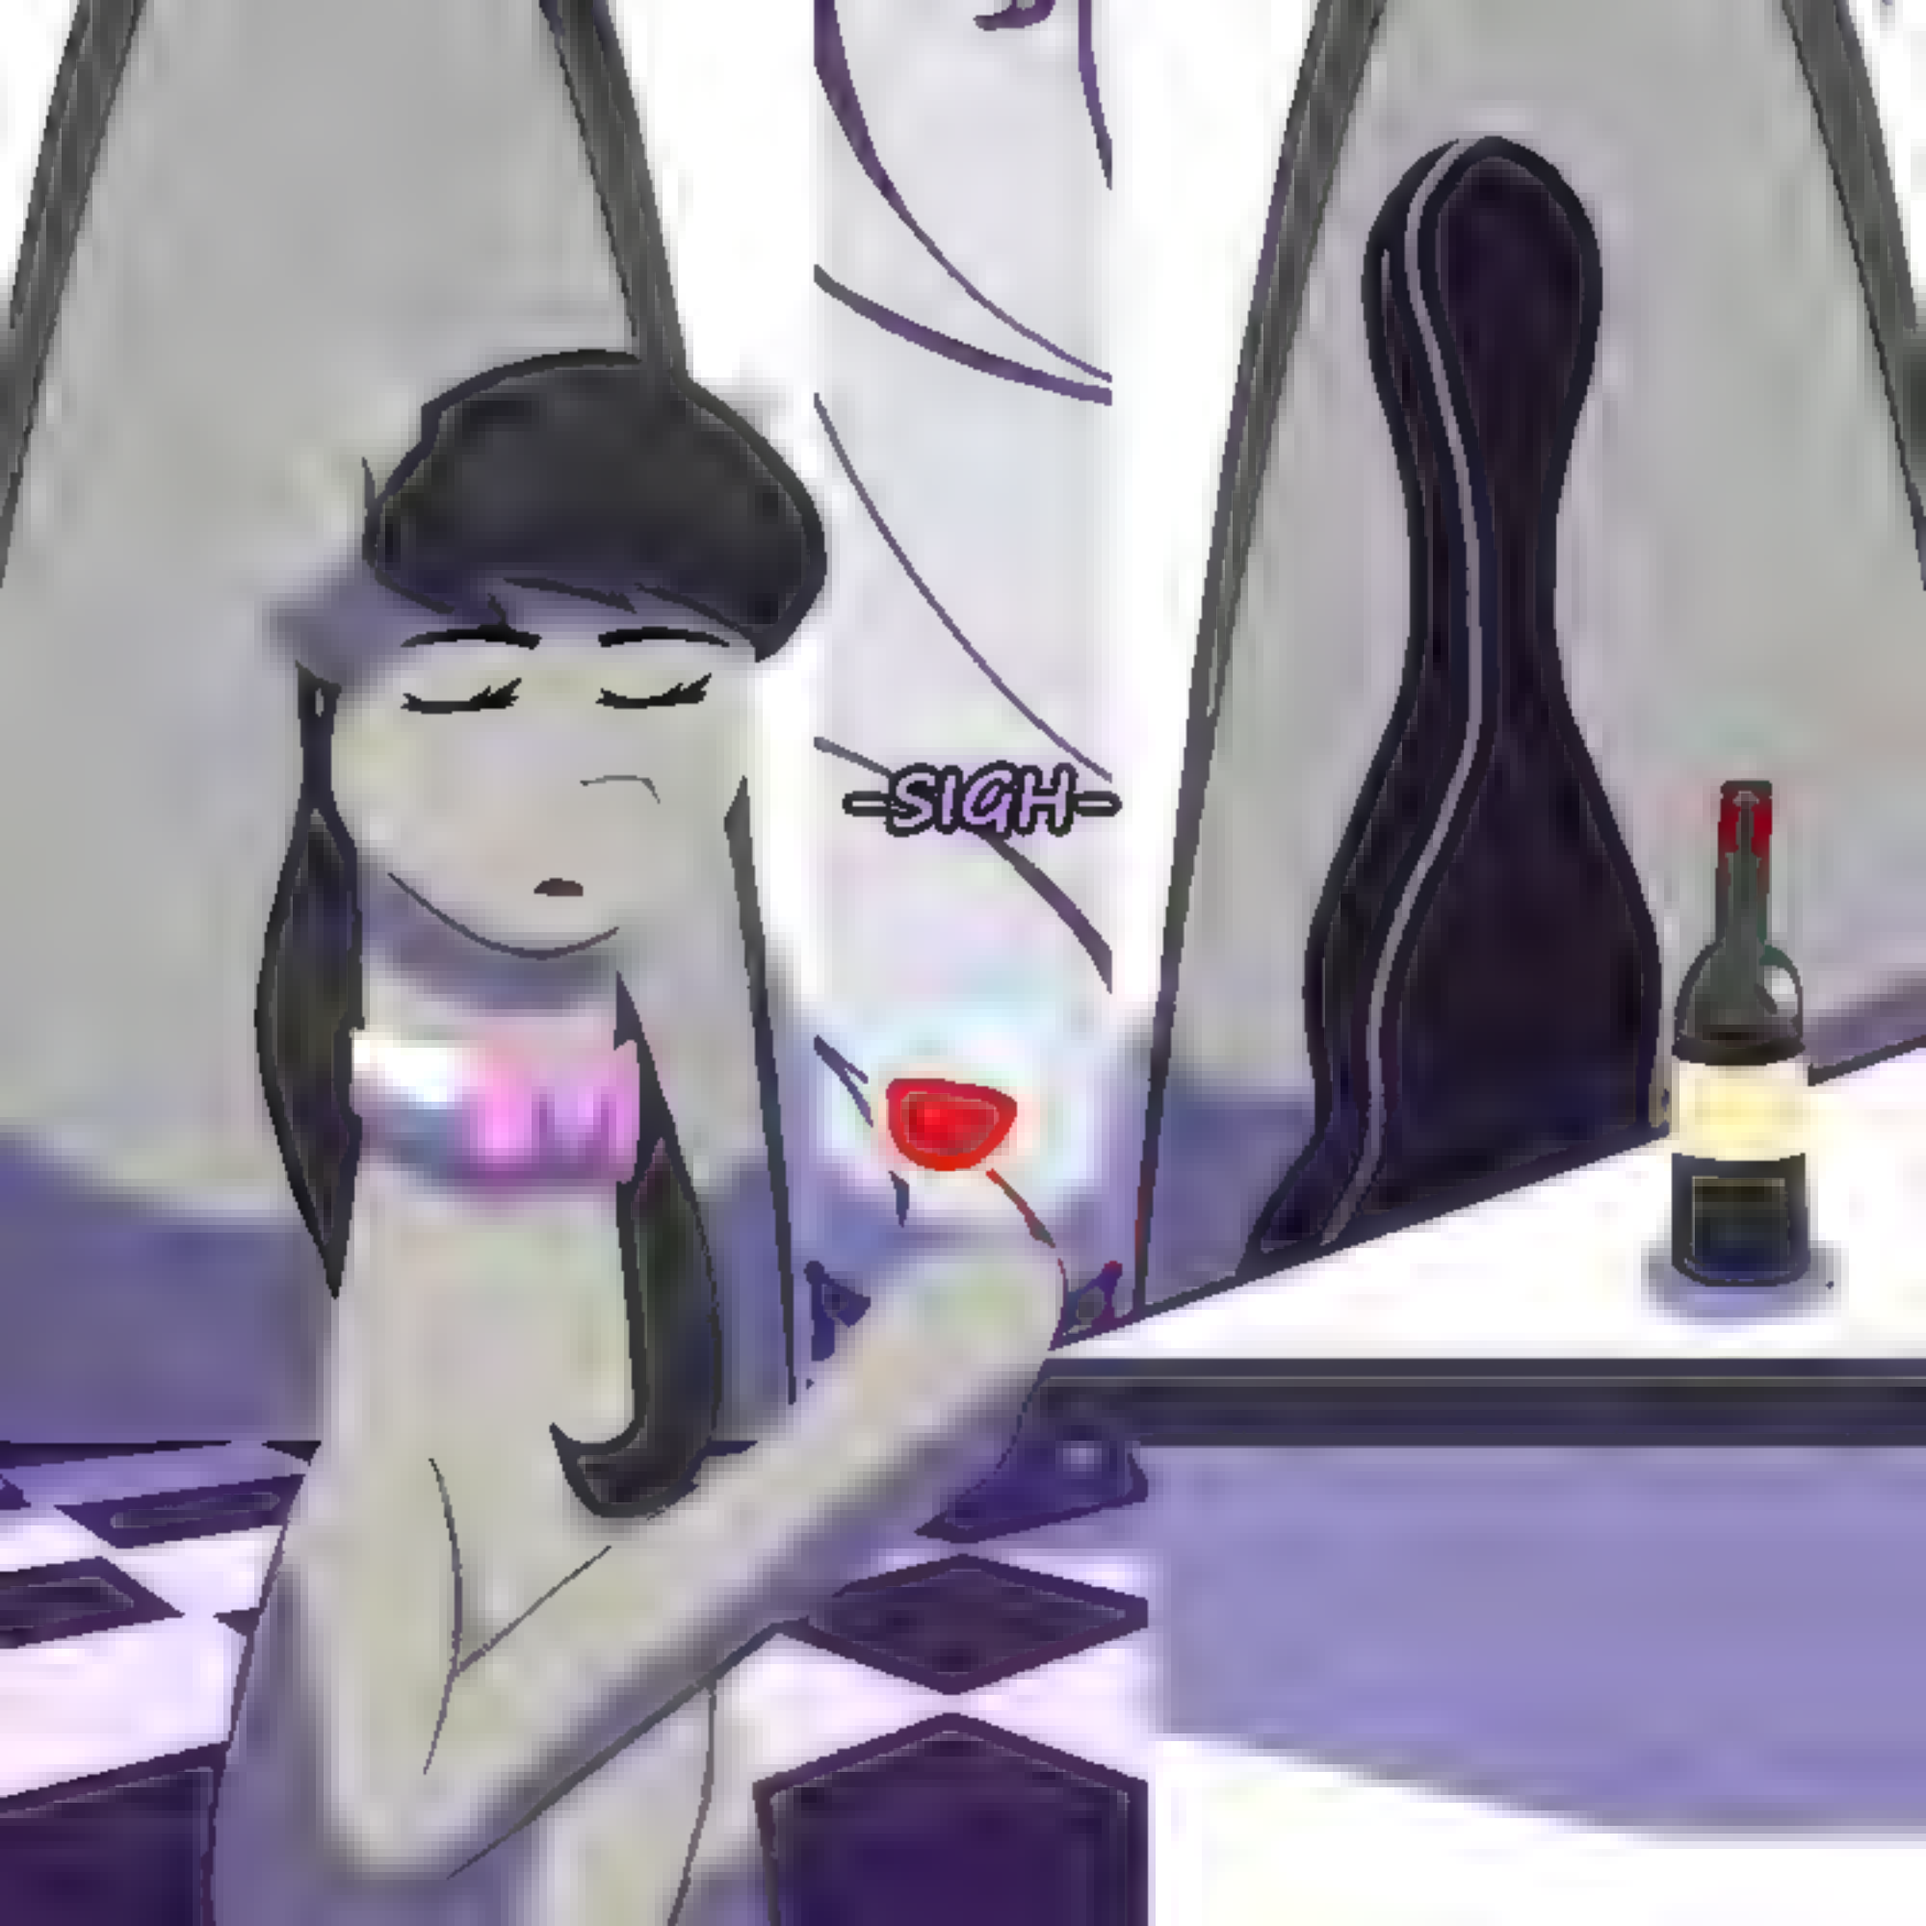
And I'm taking your TARDIS' avatar from you.

And if you cross me...

The next thing I will take from you?

I will force you to watch as Derpy, Amethyst, and Dinky stare into the Heart of the TARDIS and you WILL watch all of them BURN.

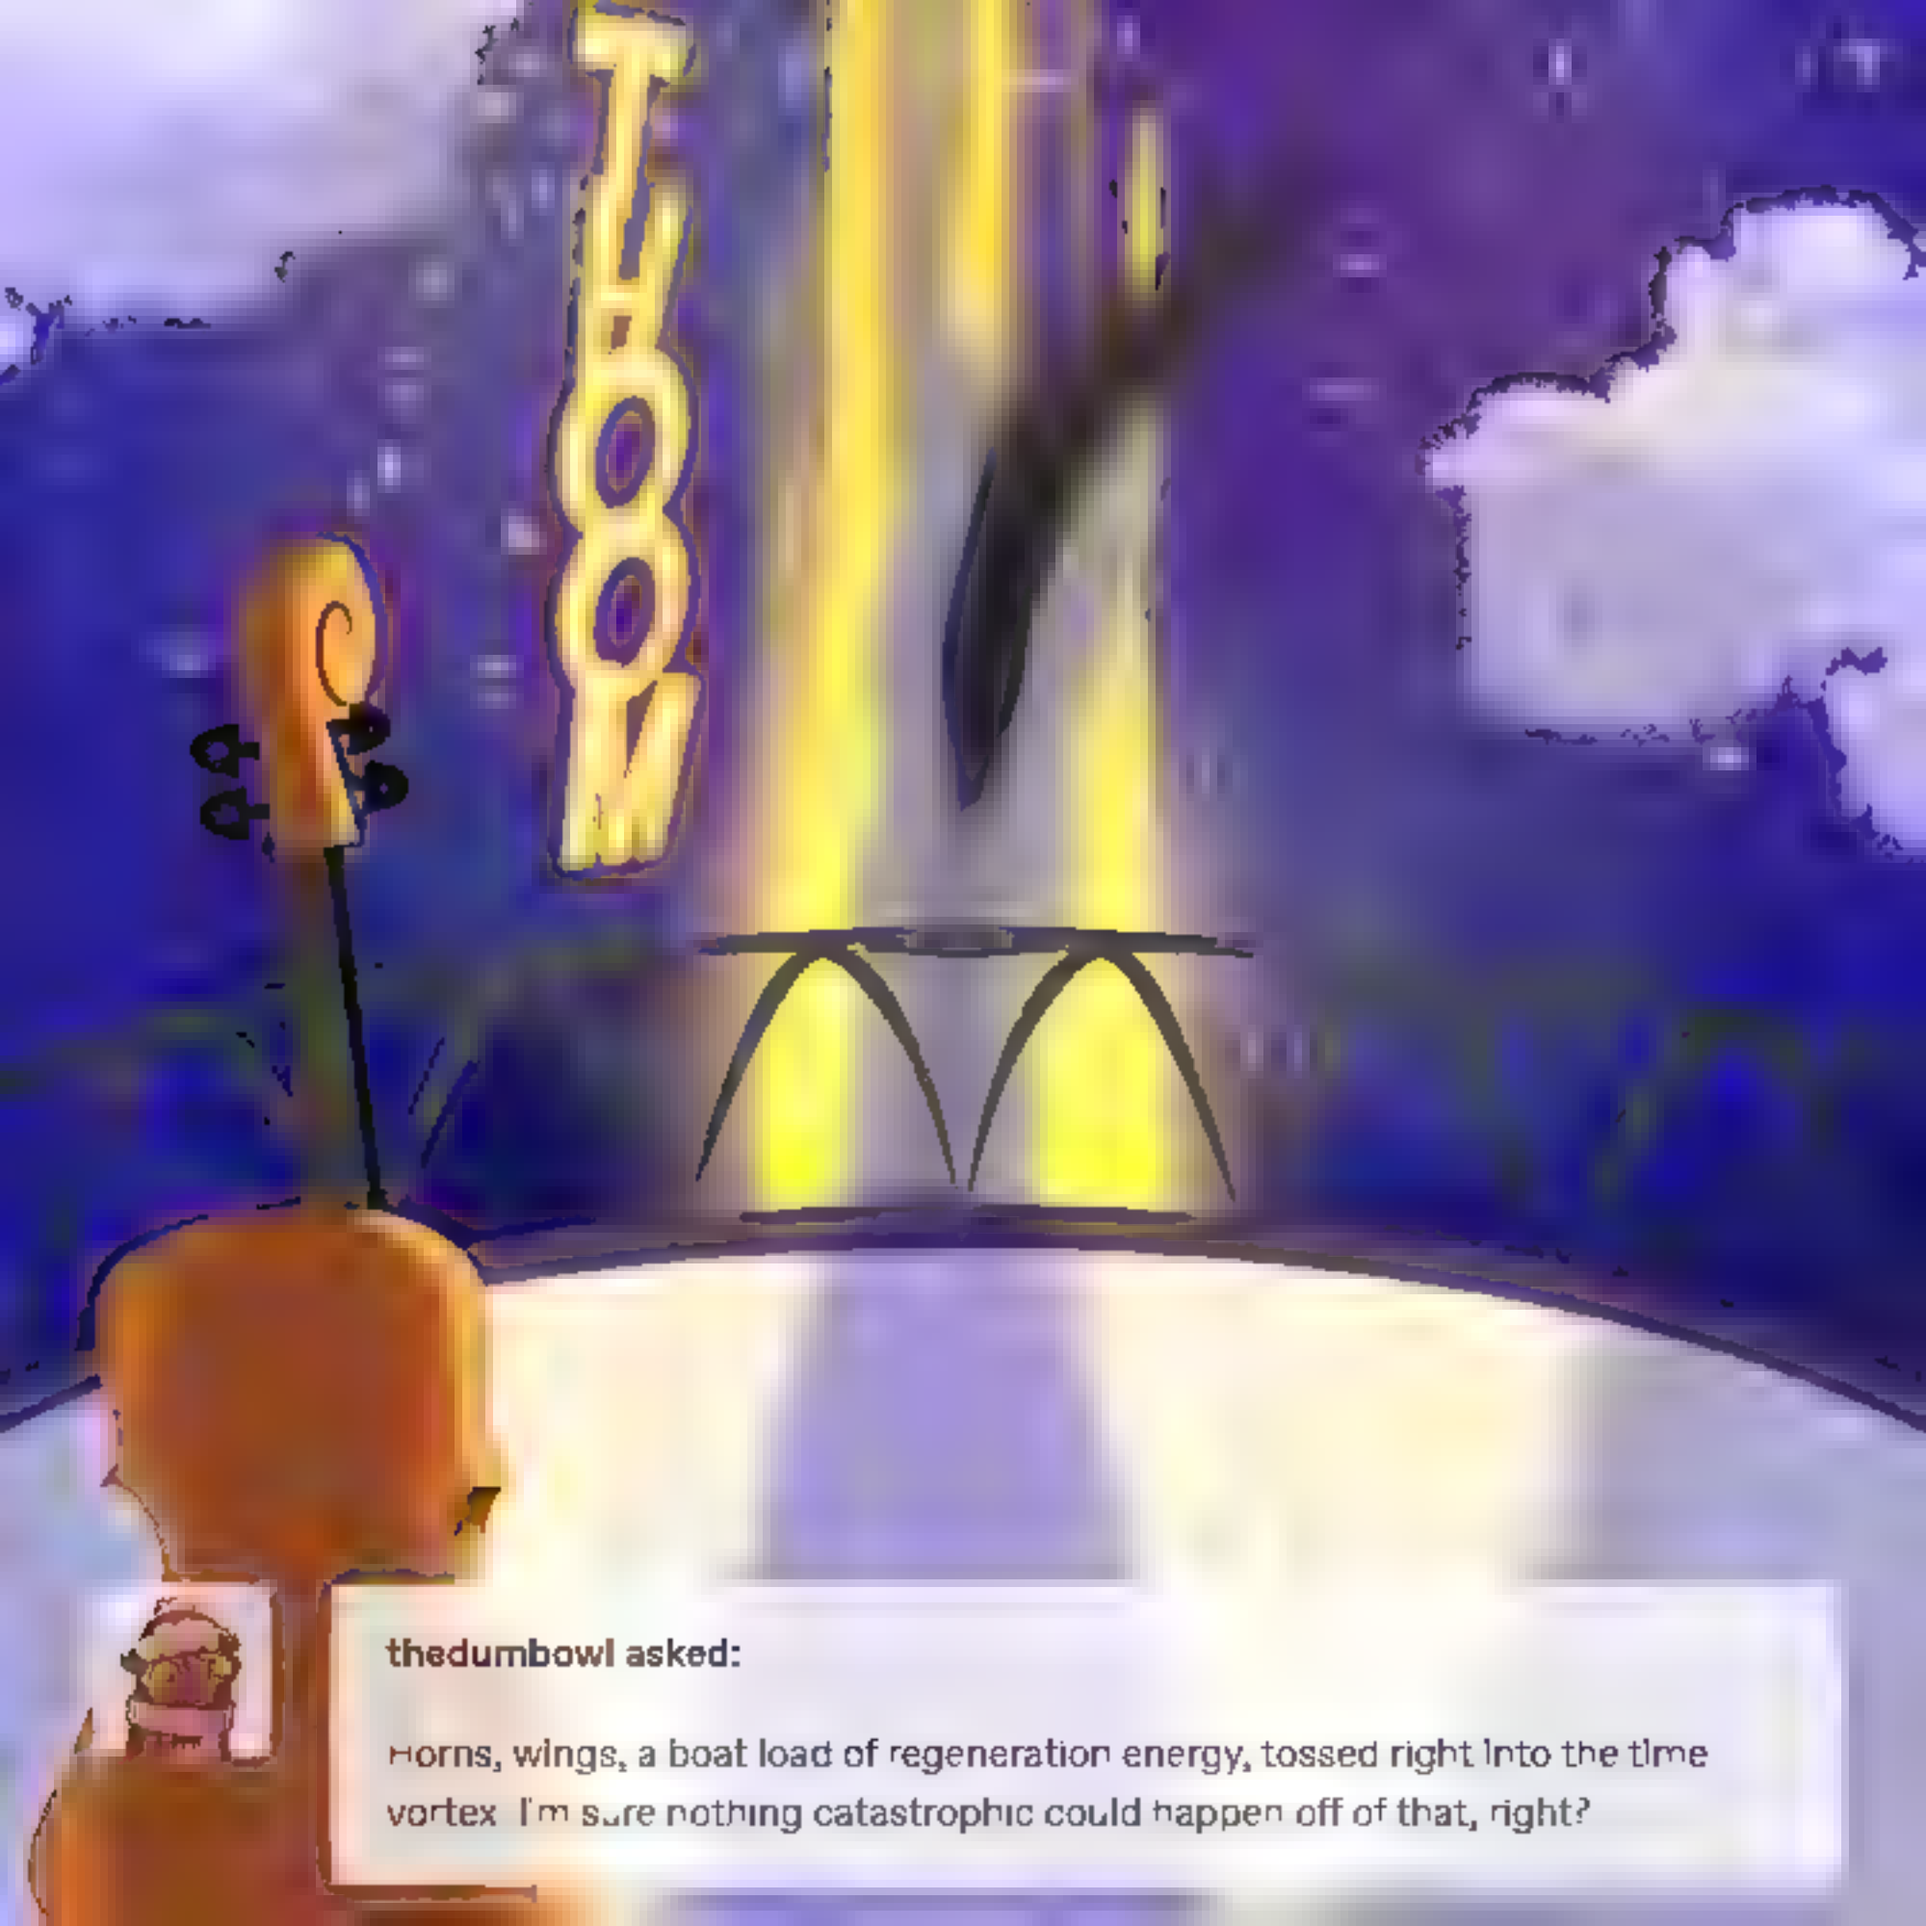
I must say, Miss Octavia, you are one of the most talented musicians to grace my ears.
My pleasure.



-SIGH-

Vat a fool for letting me go.

And yat a bastard for giving me a taste of someting so delicious zat it makes every pleasure dull...



thedumbowl asked:

Horns, wings, a boat load of regeneration energy, tossed right into the time vortex. I'm sure nothing catastrophic could happen off of that, right?

Why don't you just kill me?
The short answer is that it'd bore me to do so. The other short answer is that she didn't want you dead, so I won't kill you. At least, not yet.

No wonder your TARDIS acts out you're treating her like a mule.
What a waste of a good old girl. You realize she expended herself just to send out a distress signal? She's been pushed far past her limits, and you don't even care

I can't keep you on the road to recovery the way she'd have liked, but I can keep you from hurting anyone else.
We both know death's too good for you, so you'll be coming with me. I'm commandeering your TARDIS as well. I won't be gainsaid.

So here is how we're going to handle all of this

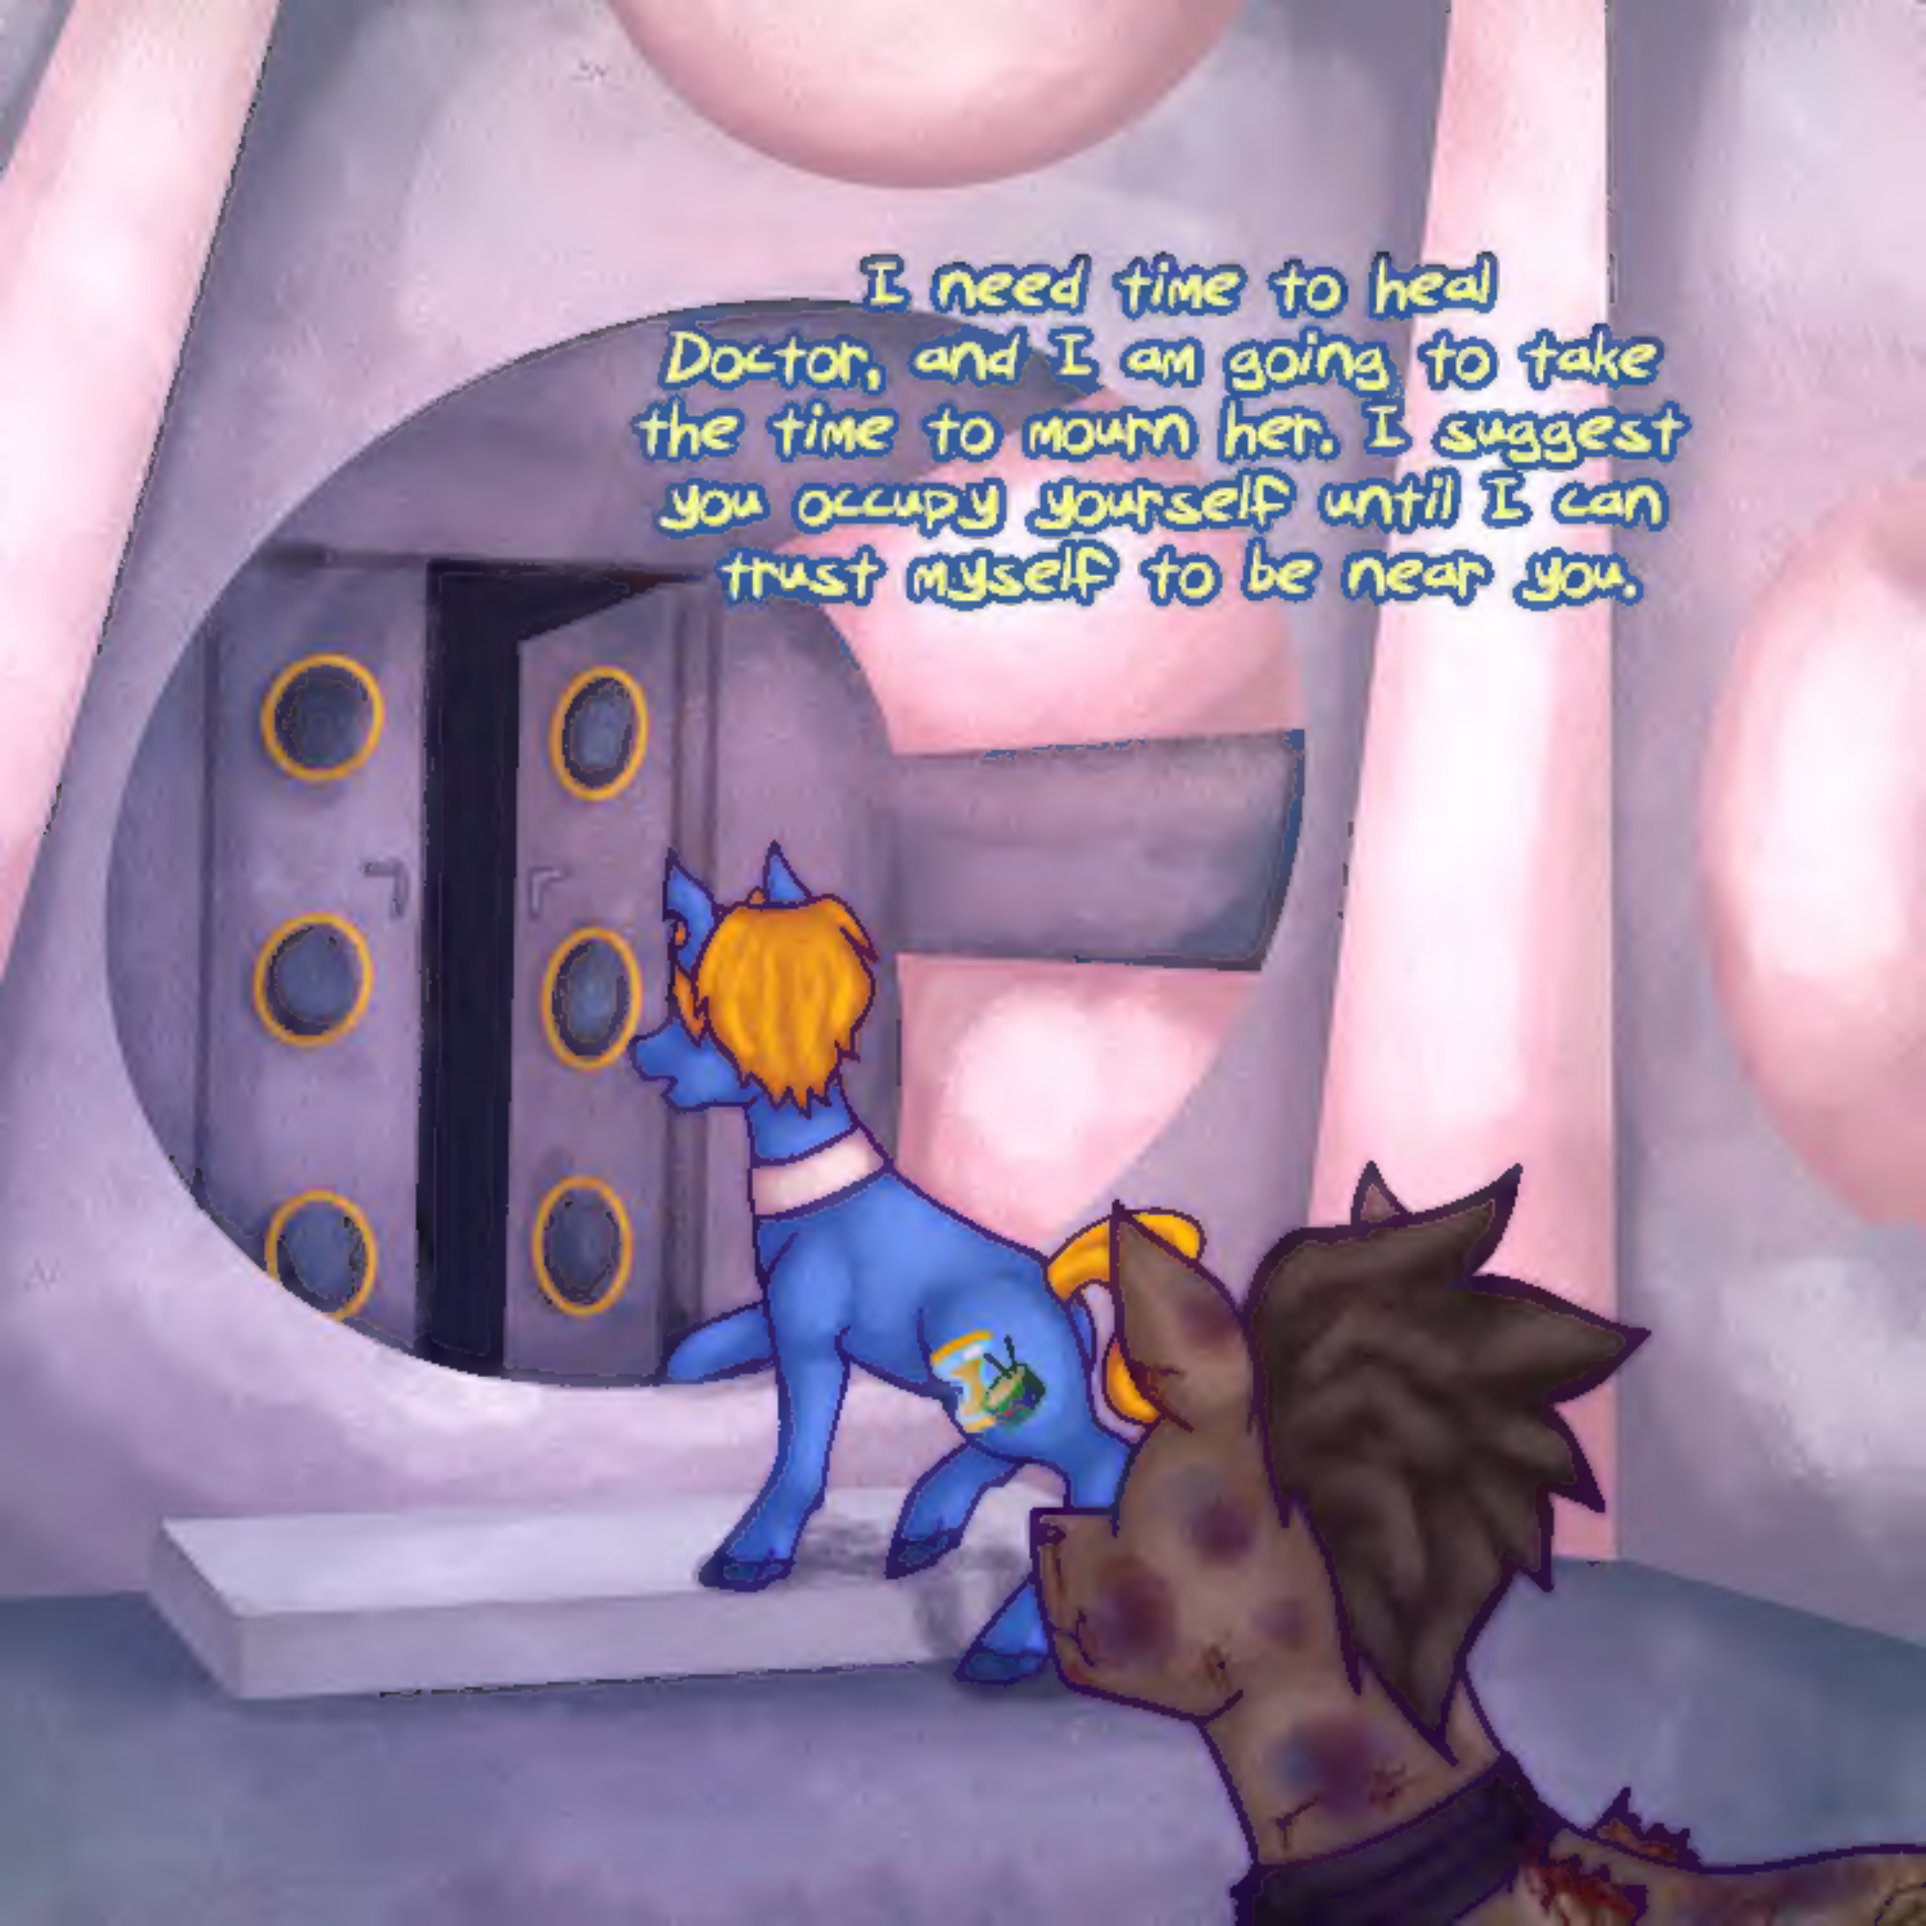
Anonymousasked:

Due to the danger the doctor is in his current state I advise you locate and detain him in a secure facility with a comfy cell where the doctor when contained would feel safe and calm and possibly set up runes to block discords effect!

What now? Do I become an experiment? A slave? Just a miserable prisoner?

Yes. A miserable prisoner for a miserable jailor. You just don't get it, all you've taken from me, all that she sacrificed for you.
And here I am alone, suffering, and once more, it's all your fault. She's now gone, off to her next adventure, and I can only hope she has room for me when I go to meet her.

She was finally happy, you know. She was finally FREE. Can you even understand that?
No Time War, no lobotomized TARDIS, and no Doctor to lie to her and break her heart. And to think she wanted to help you! So no, you're not leaving, and I refuse to let you die.



I need time to heal Doctor, and I am going to take the time to mourn her. I suggest you occupy yourself until I can trust myself to be near you.

Wait—
No.
